WINTERHAVEN MOBILE ESTATES Has Levels of Arsenic Above the Drinking Water Standard

Our water system recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what you should do, what happened, and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Water sample results received on 05/18/2016 showed arsenic levels of 0.044 mg/L. This is above the U.S. EPA standard, or maximum contaminant level (MCL) of 0.010 milligrams per liter.

What should I do?

- **You do not need to use an alternative water supply (e.g., bottled water).**
- This is not an emergency. If it had been, you would have been notified immediately. However, *some people who drink water containing arsenic in excess of the MCL over many years may experience skin damage or circulatory system problems, and may have an increased risk to getting cancer.*
- If you have other health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done?

The water sample collected on May 18, 2016 showed Arsenic concentration of 0.044 mg/L. Quarterly monitoring of Arsenic is conducted and reviewing treatment options.

For more information, please contact Terry Soloman at (661) 406-5070.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.
